Terminal Disclaimer

The terminal disclaimer filed on 4/21/2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patents 6,606,193; 6,542,300; and 6,667,787 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1-4 are allowed.

Claims 1-4 are allowable over the prior art for at least the reason that even though the prior art discloses a polarizer comprising a combination of a polarizing element and a pair of retardation films, the prior art fails to teach or reasonably suggest a polarizer comprising two layers of retardation films, wherein a slow axis of each of the retardation films is parallel with the absorption axis of the polarizing element, said two layers of retardation films being constituted by a combination of a retardation film with N_z of from 0.65 to 0.85 and a retardation film with N_z of from 0.15 to 0.35 on the condition of $n_x > n_y$ and $N_z = (n_x - n_z) / (n_x - n_y)$, as set forth by the claimed combination.
